

SPECIFICATION AND TECHNICAL INFORMATION

BRECCA ONICE

Material Type: Marble

Available Sizes: Contact us

Thickness: Contact us

Finishes: Contact us

TECHNICAL DATA

Classification:	Marble
Availability:	Limited
Average block dimensions:	Medium
Main application:	Inside/Outside
Slab variation coefficient:	Medium
Compression tensile strength:	851 kg/cm ²
Tensile strength after freeze-thaw cycles:	346 kg/cm ²
Unitary modulus of bending tensile strength:	105 kg/cm ²
Heat expansion coefficient:	0,0037 mm/m°C
Water imbibition coefficient:	0,007200
Impact strength:	31 cm
Frictional wear:	-
Mass by unit of volume:	2715 kg/m ³
